CMR Institute of Technology, Hyderabad
Bachelor's degree, Computer Science · (2017 - 2021)

Narayana junior college, Hyderabad
Intermediate, Maths, Physics and Chemistry (MPC) · (2015 - 2017)

Triveni School, Kothagudem
SSC (2015)

Project

Axonize

Axonize product is IoT based solution. With this solution a normal building can be converted to smart buildings by constantly obtaining data from various sensors and devices. These data is useful in triggering events, alarms etc. All the devices in a particular building or area can be monitored lively. Configurable dashboards enables to view data from various entities and react accordingly.

I as a front-end developer will obtain the data from API and render this data using React and other JavaScript dependencies
